FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

FCC

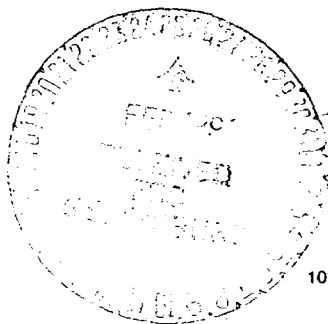

As an Amateur Radio Operator, handling traffic and emergency messages I am VERY disturbed by the actions of the FCC in citing SYSOPS of BBS'S who forwarded that dastardly message. In my humble opinion the ORIGNATOR of the messages SHOULD be the ones cited NOT the SYSOPS.

If you proceed on this course you will DESTROY the BBS system and stop a valuable avenue of information for Hams and a nonreplaceable path to send traffic.

With the volume of messages and traffic on the system it would be impossible for a SYSOP to read EVERY thing that comes into his station and if he tryed it WILL slow down things so the system WILL be USELESS.

You are putting the cart before the horse, PLEASE rethink your thinking.
